Job Title: Front-End Developer Needed for HTML, CSS, and Bootstrap Project

Hello ali,

As an experienced front-end developer with 2 years of expertise in HTML5, CSS3, and Bootstrap, I understand the requirements of your project for building a responsive website consisting of 5-6 pages. I am committed to delivering a sleek, modern, and user-friendly interface.

Previous Projects:

- **Fananiss Project:** http://fananiss.wuaze.com/?i=2

- **Coursk Project:** http://coursk.rf.gd/?i=1

- **My Personal Profile:** https://mohamedhbo.github.io/My_Profile/

Understanding of the Project:

I will follow a structured approach to ensure that the project is completed efficiently and meets your expectations:

1. **Initial Phase (20% Payment):**

   o Set up the project structure using HTML, CSS, and Bootstrap.

   o Implement wireframes and mockups to create a clean and modern layout.

   o Present the design for your feedback and approval.

2. **Development Phase (40% Payment):**

   o Develop all 5-6 pages with responsive design, ensuring seamless functionality across devices (mobile, tablet, desktop).

   o Utilize CSS Flexbox and Grid to achieve a polished layout.

   o Ensure cross-browser compatibility across major browsers (Chrome, Safari, Firefox, Edge).

3. **Testing & Deployment Phase (40% Payment):**

   o Optimize the website for fast load times and performance.

   o Conduct thorough testing to ensure all functionalities and responsiveness.

   o Deploy the website to the desired server.

Technical Skills:

- HTML5, CSS3, and Bootstrap 5

- CSS Flexbox and Grid

- Responsive Web Design

- Cross-browser compatibility

- Version control using Git

- Performance optimization

- SEO and accessibility awareness

Why I'm the Best Fit:

- I have a proven track record of delivering high-quality work on responsive websites.

- My attention to detail ensures all design elements remain consistent with the provided UI/UX.

- Familiarity with SEO principles and accessibility will help ensure your website meets industry standards.

Additional Skills (Nice to Have):

- Familiar with JavaScript frameworks like React for potential dynamic interactions.

- Experience with SCSS for CSS pre-processing, available if requested.

-

Timeline: The project will be completed within 2 weeks as requested, with milestones set for feedback and review.

Budget & Pricing: My price is $20/hour, but I am open to negotiating within the provided budget range of $500 - $700, based on the scope and requirements.

Contact Information: Feel free to reach out for any clarifications or to discuss the project further.

Sincerely,

Mohamed Sayed

Frontend Developer
